Bill,

I can wait a week for the 1 Ohm resistors. I will start a PO right now. As I said tolerance is not an issue. The lower the resistance the better.

Thanks a bunch,

Rick

Rick:

Good to hear from you.

In the 2" OD resistors, we have 4 qty W0508C2R0K (2ohms  $\pm$ 10%) in stock (\$27.90 each), or, if you can wait about 1 week, we can have some W0508C1R0J (1ohm  $\pm$ 5%) finished (\$30.40 each).

If you have any questions, please let me know.

SUBJECT: HVR Resistor availability

Dear Bill,

I am now working at ISU and needed an HVR resistor ASAP. Do you have one of the 2" OD disk, 1 O resistors in stock. I think the part number is W 050 8C 1R0 L X (tolerance does not matter). I need the lowest resistance possible.

Thanks,

Rick
