

Radiator in production run run. $E_e=41$ MeV, 200 mA, 150 Hz.

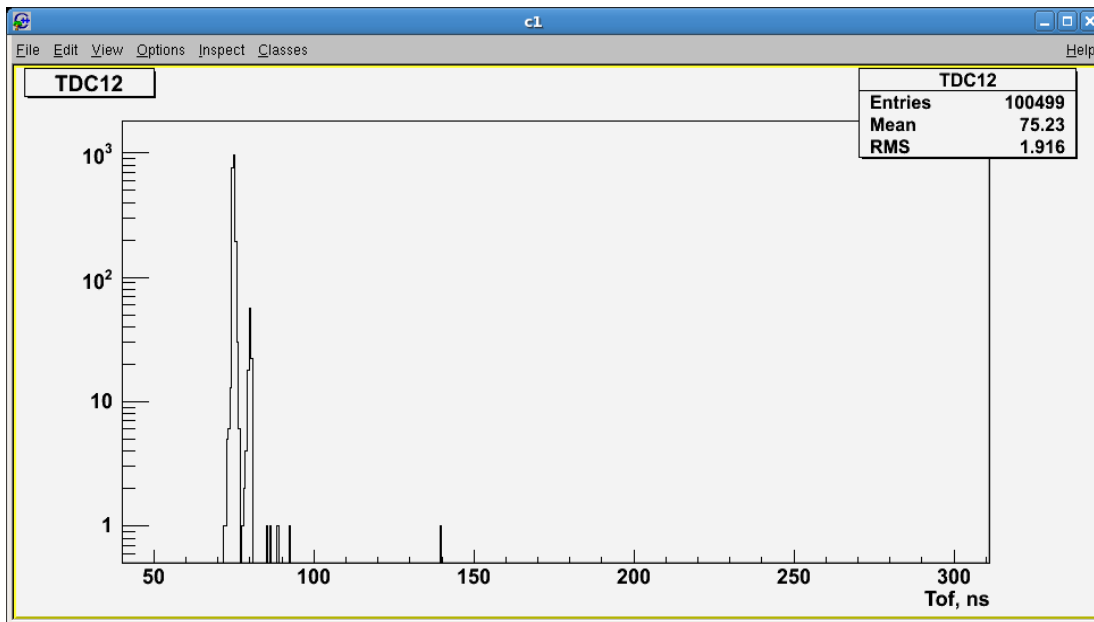

Run # 1824, TDC15 (Polina, top). Radiator in, 2" Pb brick used as a production target.

Run # 1824, TDC14 (Irina, center). Radiator in, 2" Pb brick used as a production target.

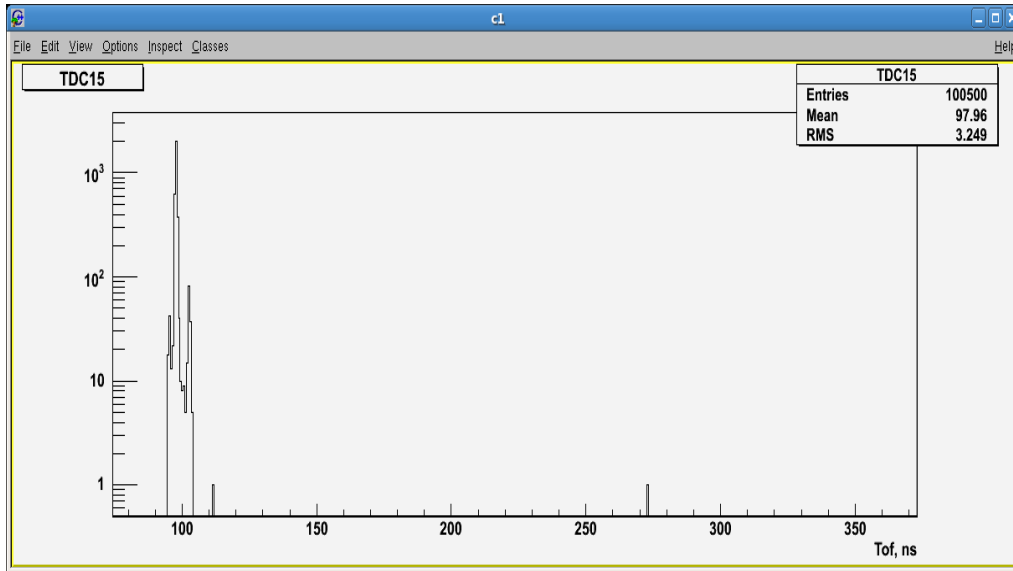

Run # 1824, TDC13 (Natali, bottom left). Radiator in, 2" Pb brick used as a production target.

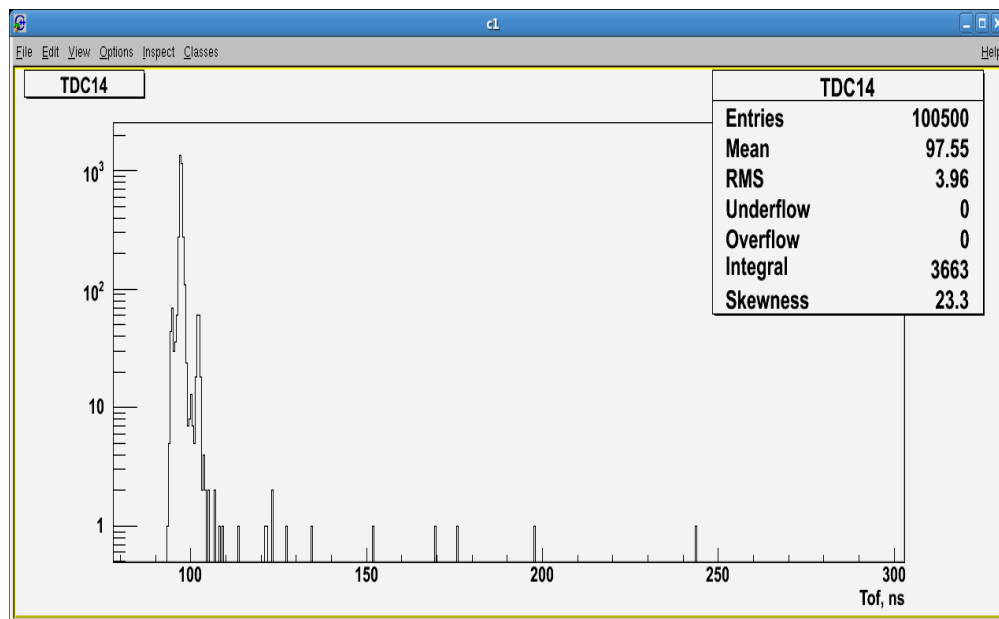

Run # 1824, TDC12 (Sofia, bottom right). Radiator in, 2" Pb brick used as a production target.

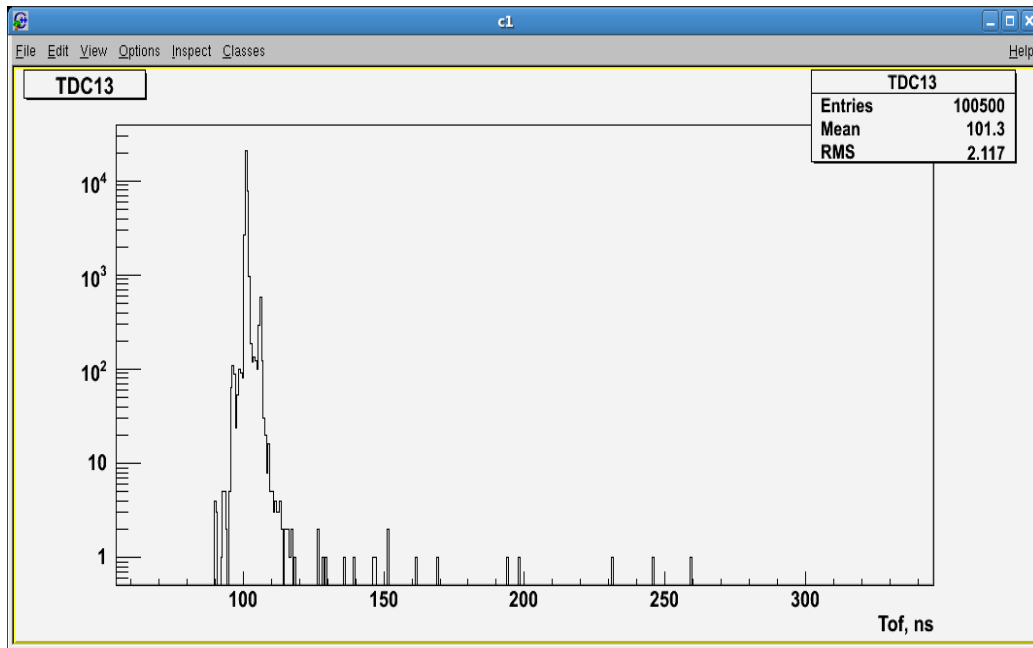

Radiator out production run run. $E_e=41$ MeV, 200 mA, 150 Hz.

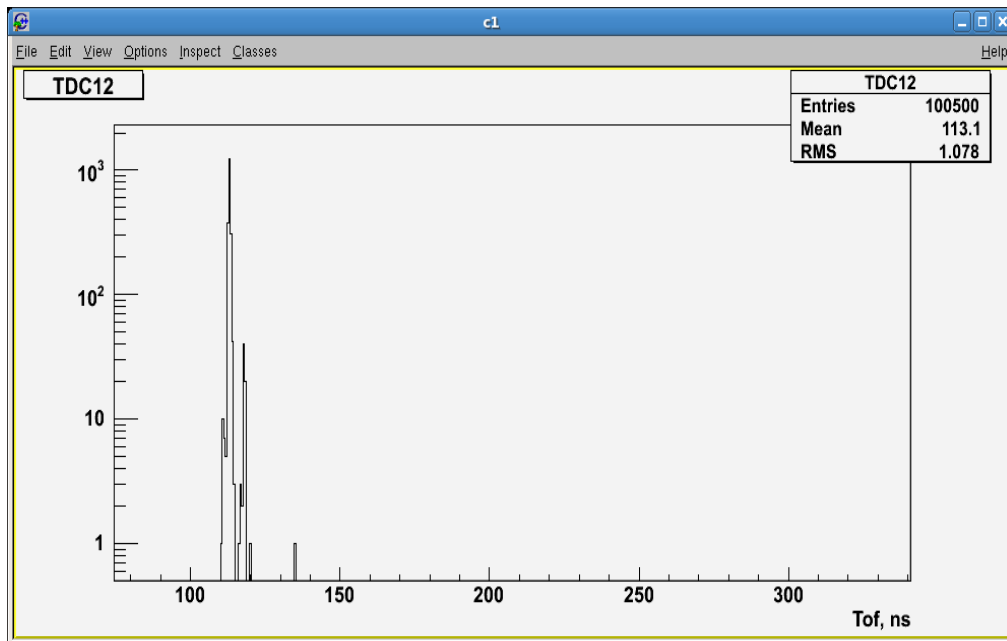

Run # 1826, TDC15 (Polina, top). Radiator out, 2" Pb brick used as a production target.

Run # 1826, TDC14 (Irina, center). Radiator out, 2" Pb brick used as a production target.

Run # 1826, TDC13 (Natali, bottom left). Radiator out, 2" Pb brick used as a production target.

Run # 1826, TDC12 (Sofiiia, bottom right). Radiator out, 2" Pb brick used as a production target.
